

To Dr. Michael Friedman-

I have recently become alerted to the extent to which genetic engineering has become a part of our nation's food supply. I am strongly against this unnatural alteration of our diet. I wish that it was not legal in any food type, but I am appalled that foods designated as 'organic' might possibly be genetically engineered. Please do not allow this to continue. I trust that you will value the opinion of the citizens ~~which are~~ who are being mislead.

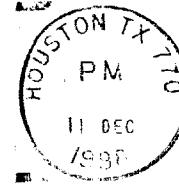

Sincerely -

Hilary Lovett
